

March 29th, 2021

Dufferin-Peel Catholic District School Board
40 Matheson Boulevard West
Mississauga, Ontario

Dear Mr. Koomar Ramessur,

Thank you for the opportunity to submit this updated quotation to your school district.

My company, EASY School Software, has been providing administrative and clerical software to schools for many years providing administrative applications for schools to over 1300 elementary, middle, and secondary schools across Canada and the USA.

We look forward to being able to work with your schools in the coming years.

Regards

Mark Fester

School Appointments Online:

School Appointments On-line is an innovative web-based service for scheduling parent teacher conferences without tying up valuable school administrative resources. This application is used for:

- Scheduling parent teacher conferences
- Kindergarten intake interviews
- Locker clean out
- Student information conferences
- Counselling appointments for course changes
- Music/Drama assessments
- Tutorial session
- Technology distribution and return
- Grad ceremonies (COVID-19 considerations)
- And many other scheduling needs...

Each school has its own unique web address and complete control over the configuration of the application for their needs.

Appointments can be made by parents who register for an account and add their children into the system. This avoids any privacy issues as the school does not have to provide parent data to a third party. Clerical users in the school can also book appointments for parents who are unable to do it themselves.

Appointments can also be booked by students where they either register or use a predefined account. The student booking sites are usually separate from the parent booking site as the booking rules are different. We setup multiple web sites for schools where there is this need.

This application has historically been invoiced based on school size to accommodate small schools. We charge per teacher/class to best address school needs. In the case of a district license, we will quote a flat rate for schools based on type, not size.

Servers:

Our servers are in Burnaby, BC, Canada, and we maintain 128-bit encryption on all our applications.

Support:

Support is available from 7am to 5pm PST and in our experience, schools require little ongoing support. Our support is provided without any limitations, and we do prefer email communication for tracking purposes.

Training:

Web training can be made available as required via Zoom or Go To Meeting. Many of our schools have registered and used the application without every making direct contact with us. We would be happy to schedule distributed training for vice principals and/or office administrators. It would be best to do different sessions for elementary and high schools as their needs are slightly different.

We can also provide training for district IMS staff should you want.

Quotation:

This quotation is based on schools using the application two or more times per school year with no limitation on the number of times the application is used at each school.

School Type	Count	Price per School	Net
Elementary	125	\$150	\$18,750
Secondary	26	\$300	\$7,800
	151		\$26,550

As some schools are already configured for this application, we would need to update all contact information and create entries for the other schools. Additional sites may need to be configured for secondary schools where a student appointments site is needed at no extra cost.

We are prepared to guarantee this price for a five-year period regardless of any growth in the DPCDSB and will only address price changes should the district close schools.

Our business policy is to offer schools their first event at no charge, so to honor this policy, we are offering your district 50% off the first year.

Other Applications:

Locker Assignment Online – www.lockerassignment.com

Easily manage your lockers, locker assignments and availability. Students can login to select their own lockers and check their locker combinations without involving school administrative resources.

Flex Time Weekly Planner – www.myweeklyplanner.net

Manage flex time blocks in high schools so that students are not too flexible. Students make plans for each flex block, choose locations/staff people to work with and then attendance can be taken, students monitored, and locations managed to prevent overflow.

Student Metrics Collection – www.ourstudentmetrics.com

Student metrics, collecting and tracking information about each student in the school is more important now than it has ever been in the COVID-19 world. Our Student Metrics offers an easy to use, inexpensive platform to collect data daily from all the students in the school, and gives the school administration a quick overview of the collected data for a given day or range of days to monitor changes in student health metrics.

Hot Lunches Online – www.hotlunches.net

An easy to use yet powerful system for the placing and management of school hot lunch programs. No transaction fees, no limits on the number of menu dates, menu items, number of orders or frequency of order placement.

Counsellor Appointments Online – www.counsellorappointments.com

Counsellor Appointments On-line is an innovative web service for booking counsellor appointments through a user-friendly web interface. Students can book their appointments 24 hours a day from any location.
